## Our Kitties

**Actual Kittens**

**Previous litters**

**Reservation**

Our cattery breeds healthy and happy kittens that make affectionate companions as well as exceptional competitors at a show ring. Kittens live as members of our family. They can sleep in our bed, run and play games all around our flat. Our kittens grow up like our children in a loving family. We are immensely pleased that we can enjoy so much their first weeks of life! We expect every litter with a lot of enthusiasm to receive what mother nature so generously has prepared for us.

Kittens should be at least 12-13 weeks old before they leave the cattery. According to European Union rules, vaccination against rabies must be inoculated at least 21 days before kittens leave Slovakia. We guarantee kittens' perfect health condition when they leave our cattery as they are fully vaccinated and their parents are tested for FeLV, FIV, and PKD. In addition, they are all bloodgroup typed. Our dames and sires come from breeders in Germany, Sweden and the

Netherlands, who also test their cats for PKD and HCM, being all negative for these diseases. We feed our kittens Royal Canin and Hill's, super premium kitten food, lines Baby kitten and Kitten (sometimes we also use Animonda and ANF). All kittens are fed only high-quality cat food, baby milk and Vitamin preparations in addition to cooked chicken and meat every day. As we have a permanent indoor breeding, our cats have access to a safety window and a balcony for relaxation and games. Silver Legend does not offer stud service nor do we allow any outside cats into our home to avoid any risk to the health of all our cats. We always search for a loving home for every kitten and prefer to place them as pets with people who will love them and devote time and care to them.

Every kitten leave us with:

- Sales contract
- Pedigree FIFe
- Microchip
- Pet Passport
- Transfer document FIFe
- CD with photos
- Favourite food and Toys
- four times dewormed and fully vaccinated (including Rabies).

The kittens from our cattery are available as hobby kittens (pets) or kittens for showing and breeding.

**Hobby kittens (pets)** are not recommended for showing and/or breeding. They make loving and loyal companions, and will have to be castrated/neutered before reaching maturity. Although they have gotten British looks and lovely British temperament from their parents, their features are not good enough to participate in shows or to be part of a breeding program. Their price is generally lower than the price of kittens which will be part of a breeding program. Pet kittens should be neutered when they are between 8 and 16 months old. Kittens sold as pets will not be shown in competition without permission of the breeder.

**Kittens for breeding** are the ones that show excellent type, coat color, tabby pattern and eye color as they will be producing babies in the future.

New owners are responsible for all transportation costs after the kittens leave the cattery.

The color of kittens of Silver Legend are:

Black silver tabby classic with green eyes - BRI ns 22 64 & Black golden shaded - BRI ny 11

\*\*\*\*\*

**Silver tabby kittens** - To display excellent tabby marking when the kittens become adults, the kitten should have very dark tabby pattern with more parts in black they are babies. The tabby pattern is developed as the kitten grows up and gets older. The green color of the eyes is definitely established when the cat reaches 3 years of age, and not when the baby turns 3 months of age.

**Golden shaded kittens** sometime are born with ghost tabby pattern, which will disappear when the cat reaches 3 years of age. The green color of the eyes is definitely established when the cat reaches 3 years of age as it also needs time to develop.
